Read the passage to answer questions 80-82

There never used to be as many cars on the road as there are today. It seems that as we improve the roads, more people want to drive. The more roads there are, the more cars there are on them. In addition, people are driving bigger and bigger cars. This also contributes to more crowded roads. However, this trend will probably change as soon as gasoline prices increase. The higher the price of gasoline, the smaller cars get. One thing we probably won't be seeing any time soon is faster cars. If you want to get somewhere quickly, you still have to go by plane. Fortunately, plane tickets are a lot cheaper than they used to be.

80. What is said about roads and cars?

- A. Fewer people drive nowadays.
- B. The number of cars will increase as roads improve
- C. There will be less cars on the roads in the future.
- D. There are fewer good roads today.

81. Why will more people start driving smaller cars?

- A. The price of gasoline is going up.
- B. The roads are getting crowded.
- C. The roads are getting smaller.
- D. The price of bigger cars is too high.

82. According to the passage, what is the advantage of a plane over a car?

- A. It is cheaper
- B. It is bigger
- C. It is faster
- D. It is less crowded
